**Hello there,**

It's an absolute pleasure to meet your acquaintance.

Let's get to know each other.

I'll start!

I'm a UI/UX designer and web developer. I love what I do and so do my clients. I have gotten the chance to work and be mentored by award-winning creatives. I currently perfect my expertise at **MB96**, a creative agency based in Nairobi, Kenya.

I also have worked on standalone projects that I have gotten through recommendations and referrals.

My specialities in the creative industry include concept development, web UI/UX designing, design methodologies, prototyping, motion graphics and web development.

With my leisure time I love to engage in writing and practicing code, I personally love CSS and animations. I do take my time to improve my skills in photoshop, illustrator and after effects, all in the fruition of becoming a creative director.

I love gaming (1st person open world games) and getting to watch tutorials on game dev using the unreal engine and unity hub.

Now that you've gotten to know me,

Allow me to show the work I have been able to accomplish at mb96 and as a freelancer.

Sincerely,

# David Waweru
